

AVANTI SERIES

The AVANTI 3025 features the full-size graphic display with icon interface, 29 programmable buttons, 16 softkeys, mouse operation and a full duplex speakerphone. All features and functions listed are available on the 3025.

The AVANTI 3020F and 3020H stations have a four-line, 24-character display. On the 3020, one line is dynamic, showing day, date, time and call status. The others are for menu items, activated by the six softkeys on either side of the display. Both 3020 sets have 24 programmable buttons. The 3020F has a full duplex speakerphone; the 3020H has a half-duplex speakerphone.

The AVANTI 3015F and 3015DH have a two-line, 20-character display. One line is dynamic, like the 3020, the others are for menu items activated by three softkeys below the display. There are 19 programmable buttons and a full duplex speakerphone on the 3015DF, halfduplex on the 3015DH.

The AVANTI 3015H. Where a display is unnecessary, the 3015H gives you 19 programmable buttons that can be used for speed dial, DSS, as line keys or to access any feature. It also features TELRAD's hot dialpad and a high quality speakerphone.

The AVANTI 3000, even the most economical AVANTI station offers advanced capabilities, including handsfree answerback, onhook dialing and four-button programmability, in addition to the hot dialpad and nine fixed function keys.

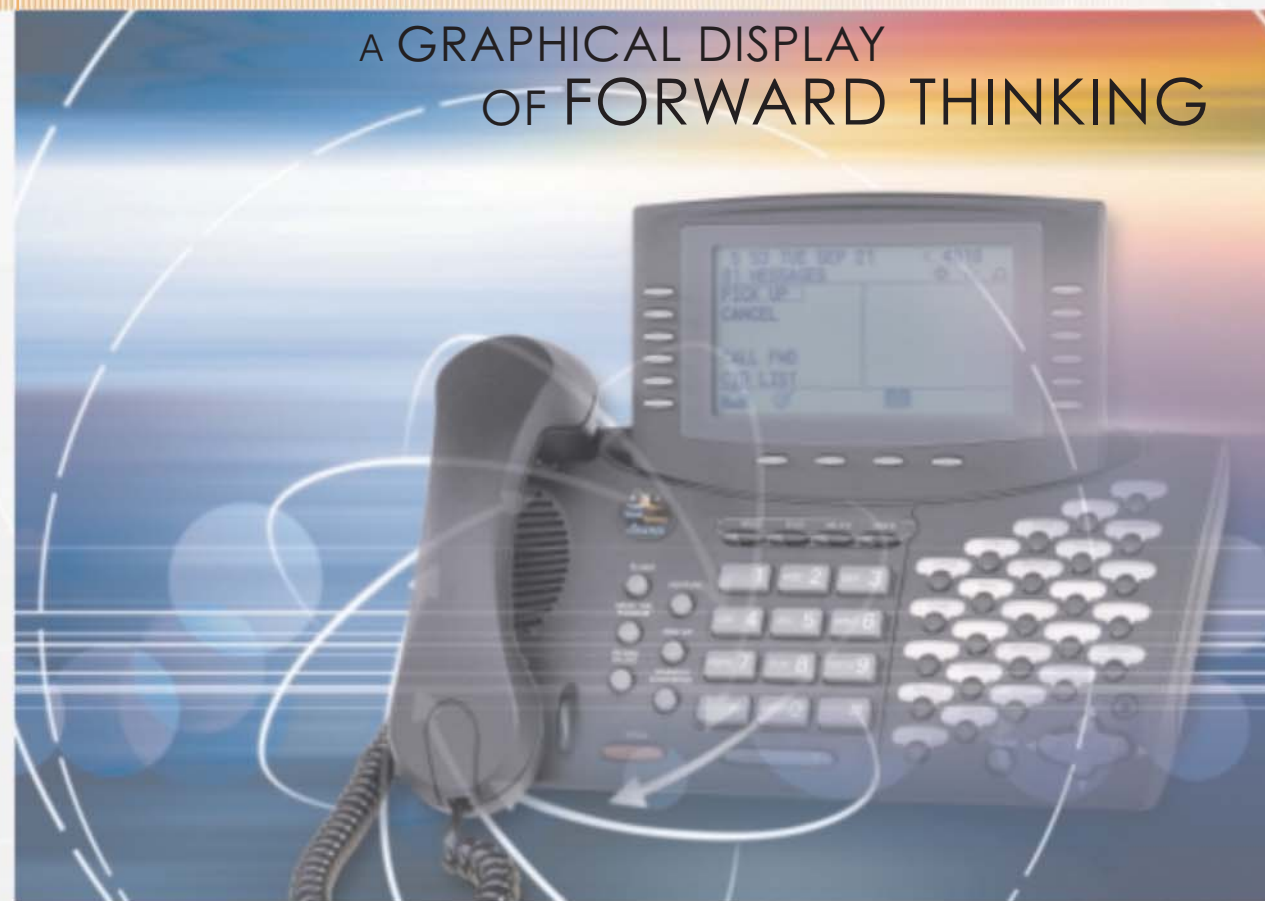

The DSS Add-On Module. The easy and flexible answer to your additional function key needs. Each Module has a four-button map and 30 programmable buttons that can be designed for memory, speed dial access or automatic redial. As many as four modules may be attached to any AVANTI 3025, 3020, or 3015 station.

A FEW OF THE MANY FEATURES AVAILABLE:

- Large 128 x 240 LCD Graphical User Interface (GUI)

- Headset connection
- Standard or K-style handset
- Wall-mountable
- CoOperate third party call control link

A GRAPHICAL DISPLAY OF FORWARD THINKING

SOMETHING STRIKINGLY DIFFERENT IS GOING ON. . .

Even at first glance, you know the AVANTI series is a giant leap forward in telephone design. The extra large LCD display is actually **THE FIRST GRAPHICAL USER INTERFACE (GUI)** on a telephone station. The four-button cursor-movement touch-pad "mouse" gives you one-touch access to a wide range of features and functions.

A closer look reveals even more impressive, user-friendly features like a *high-quality, full-duplex speakerphone, built-in ACD capability and the stations are CTI-ready.* Of course, there's a full spectrum of station choices for every application and every employee.

In the Telrad Connegy tradition, existing customers can easily upgrade their current Telrad Connegy Digital systems to operate the AVANTI stations. And since AVANTI is designed to accommodate **FUTURE Technologies**, you can be sure your investment will be secure for years to come.

DESIGNED WITH THE FUTURE IN MIND.

All-in-one high quality speakerphone and graphical user interface telephone stations.
